

DID YOU
KNOW YOU
COULD BE
WASTING
VALUABLE
ENERGY
NOW?

Gain **FREE** energy from your
EXISTING refrigeration systems

green
cooling

- ✓ Capture & recycle waste heat from cooling systems & low temperature refrigeration systems
- ✓ **Zero Cost** & virtually **Zero Carbon** energy provides huge savings by reducing the use of gas and/or electric heating
- ✓ Retrofit or new installation, the GC Integrated Thermal Hub provides the ideal means of integrating energy systems
- ✓ Experienced refrigeration & thermal system design engineers are able to provide a practical & cohesive approach to simultaneous cooling & heating solutions

Green Cooling provides a full design, specification and installation service of high specification, cost effective cold rooms and cold storage facilities incorporating many heat recovery and energy saving solutions for many leading UK food service, processing and storage companies and has a proven track record of on-time on-budget delivery by experienced project engineers.

TYPICAL COLD ROOM

SAVE

£3,500-£6,000
PER YEAR*

Gain **FREE energy** from your **EXISTING refrigeration systems**

Request a **FREE site survey** or **FREE consultation** from the **industry leading food refrigeration specialists**

Call: **01253 685145** Email: **sales@greencooling.co.uk**

Visit: **www.greencooling.co.uk**

*Actual savings are dependent on the annual kWh amount of electric or gas heating displaced by the refrigeration heat on each application.
